FREIGHT COMPANY.

YRC FREIGHT OVERVIEW

INFORMATION FROM THE LTL SHIPPING EXPERTS

YRC[®]
FREIGHT

HOW SHIPPING IS DONE.

YOU HAVE FREIGHT THAT NEEDS TO GET SOMEWHERE IN NORTH AMERICA. READY, SET, GO.

When that one thing needs to get to that one place at that really specific time, you don't have the time or money to roll the dice. That's why you call the experts at YRC Freight. Our comprehensive network is built to connect your supply chains. Our expanded portfolio of services gives you more flexibility to get it there. And after doing this a long, long time, there aren't too many logistics problems we can't solve. We also offer superior cross-border services to Mexico and Canada, and are the only LTL transportation provider with representatives on-site at all major border-crossings to expedite customs clearance. Need to send something to Alaska, Hawaii, Puerto Rico, U.S. Virgin Islands or Guam? Yeah, we have those covered too.

You tell us when and where, and we'll show you how shipping is done.

FREIGHT

HOW SHIPPING IS DONE.

yrcfreight.com

THE ORIGINAL

LTL

EXPERTS

YRC Freight was founded in 1929 making it the first national LTL network in the United States. We've grown a little bit since those days, but our mission to be the most trusted and reliable name in shipping is still the same.

We have a comprehensive North American coverage area, a broad portfolio of services and a staff dedicated to providing freight solutions, no matter how simple or complex they may be. In other words, everything you would expect from the company that practically invented LTL shipping.

WE ARE THE PEOPLE

BEHIND THE WHEEL, BEHIND THE STUFF THAT SHOWED UP ON TIME.

Trucks move freight. But behind those trucks we've got a crack team of logistics experts, dock workers and drivers ready to spring into action. In the beginning, we built YRC Freight on trust and strong personal relationships, and that's the way we still do things today. From the time you place your order until the moment it reaches its destination, there will be a person at every touch point to make the process as seamless as possible.
